INTRODUCTION

G'day! As a solutions-oriented software engineer, I refine core systems and implement custom tools to reduce developer iteration time and enhance pipeline scalability. I leverage emergent graphics and engine technologies to shape immersive, high-performance interactive experiences. I tackle problems with unconventional methods—driving innovation, optimizing workflows, and delivering tangible technical results.

9.5 YEARS PROFESSIONAL EXPERIENCE

7	year(s)	XR Development
4	years(s)	Proprietary Engines → C++20 C++23
4	years(s)	Unreal 4 → C++19 & Blueprints
1	years(s)	Unity → C# (v9.0)
0.5	years(s)	ThreeJS VR

PLAYSIDE - SOFTWARE ENGINEER II

2.9 YEARS 2022 - 2025

Sid Meier's Civilization VII - XR

- Reverse engineered low-level 20 year old *proprietary* engine & tools
- Implemented MetaSDK with cross platform backend (friends, achievements, etc)
- Implemented Meta Achievements system
- Profiling proficiency: MQDH, Snapdragon, Telemetry, RenderDoc
- Used years of XR experience to assist in design guidance
- Assisted in XR device motion noise reduction for a pleasurable UI/UX experience
- Replaced legacy FacebookSDK with MetaSDK
- Wrote internal documentation on XR best practises

ZERO ONE STUDIO - MID PROGRAMMER

5.5 YEARS 2016 - 2022

Overall Responsibilities & Expertise

- Technical director → report and resolve all technical issues
- Provided onsite XR device support to clients
- Built custom XR multiplayer experiences
- Built offline stereoscopic rendering systems
- Device experience: Odyssey, Vive, Oculus Rift, Windows MR, Quest 2

Showroom VR

- Built in UE4, clients could use VR to explore geographically reconstructed corner of Adidas flagship store in Paris -- inside and outside (50 million verts)
- Design and implemented XR movement accessibility features
- Built multiple XR UX features:
 - Interactive TVs
 - Play basketball
 - Pick up, inspect or throw shoes

Table of Tales: The Crooked Crown [VR]

- Porting existing PS4VR Unity project to Steam VR & non-XR, Quest 2 & Switch
- Built low profile lighting and shading systems for Quest 2 & Switch
- Converted VR experience into a non-XR experience
- Built dynamic camera system for Steam non-XR
- Bug fixing and optimization across multiple disciplines

Audio mixing VR project

- Built in UE4, using an experimental Audio Mixer module, I built a virtual mixing environment.
- Using hand data from OculusSDK, users could interact with faders & pots
- Instanced stereoscopic rendering & instanced interactables? 23 FPS → 70 FPS
